

Who We Are

Established in 2006 and located in Springville, Indiana, A-1 Excavating, L.L.C. is a top-tier dump truck service owned by Cam and Amy Spires since 2012. Boasting a fleet of 15 dump trucks, and a DBE and WBE certification from the State of Indiana, we deliver exceptional local hauling and snow removal services. Enhancing our capabilities, our seasoned expert Chris Ragan, an associate graduate in Diesel and Truck Service Management, is able to provide in house repairs to keep our fleet safe and on the road daily.

What We Do

A1 Excavating LLC specializes in hauling Construction Aggregates to your projects big or small. A1 Excavating is conveniently located near 4 local quarries making stone deliveries efficient.

The Fleet

The size of our fleet allows A1 Excavating to move a significant tonnage in a limited time frame for your larger jobs.

Tri-Axles:

A1 Excavating has 11 Tri-axles all with steel beds. A Tri-Axle hauls approximately 20 ton and requires nearly 20 feet of overhead clearance to raise the bed fully upright.

Quad Axles:

A1 Excavating has 4 Quad Axle dump trucks with steel beds. A Quad-axle can haul approximately 22 ton and requires nearly 24 feet of overhead clearance to raise the bed fully upright.

Roll Off Truck:

A1 owns a Roll off truck that is perfect for construction haul off with their barn style door. A1 has 20, 30 and 40 yard dumpsters available for rent.

To Consider:

FAQ's

1. Dump Trucks are heavy loaded they will weigh approximately 68,000 lbs.
2. Are there overhead power lines or trees that would limit access to your construction site or driveway? Our trucks at minimum require 20 feet of overhead clearance (to dump).
3. Would you like your stone spread or dumped in a pile? Is the dump location marked?
4. Our skilled drivers are able to tailgate your stone along the length of your drive.
5. Stone Selection. Is this the initial stone or is there a base?
6. Due to the trucks weight, we will only be able to go off non-paved or gravel areas when it is dry.
