

Story Time

Reading is essential for a child's developing mind. Studies have shown that children who are read to develop a love for reading and discovery having a greater positive outlook on life.

During our story times, Moms and Dads can relax as our "readers" share positive, encouraging stories to uplift your children and fill their hearts and minds with a sense of wonder, stirring their imagination. So, stop by enjoy some conversation and relaxation with other adults while your children enjoy a time of learning and imagination. Join us during the school year, every 2nd Thursday of the month.

Kid's Craft Day

Do you remember when children had great times of invention, playing with sticks, leaves, empty thread spools, and empty toilet paper rolls? These items used to be standard fair in households. You and your children can revisit those days and do so much more every third Saturday from 9:30 am – 11:30 am. Join us for "Kid craft" days where your children, pre-K through 12, can stir the feeling of invention and discovery away from their electronics, learning to use their own skills and imaginations to create their own special treasures. Coming soon...special craft days designed for small groups.

Illuminate Tutoring

Our children are learning many things in so many new ways. It is hard for us to keep up, and at times, it is especially hard for our children. Every Monday evening at 6PM – 8PM free tutoring is available for any subject from 1st to 12th grade.

Crochet and Knitting

Textiles have kept us warm for thousands of years, protected us from the elements, and added design and color to our lives. Our team meets every Monday from 10AM until Noon, continuing this tradition and teaching others to appreciate the skills necessary to excel at this craft.

Snips and Sneakers

Every once in a while, your child needs a haircut. A local barber and a local hairstylist regularly come together at our building to provide free haircuts. Quality styling is free, and if they are in need, we have high-quality and stylish sneakers so every child walks away from head to toe feeling fresh and new! Keep checking with us; sometimes, we even open it up to people of all ages to receive free haircuts!

Mon Valley Mammoths Robotics

Do you remember erector sets and tinker toys? These were fun and stirred interest in how things worked. Our robotics program does that and so much more. Children from kindergarten through twelfth grade create robots for fun and competition. While having fun, they develop talents they didn't realize they had and gain marketable skills for their future. No experience necessary just a love for discovery!

Community Threads Design Studio

Taking a piece of cloth, a sewing machine and thread and creating something beautiful to wear is artistry. Our design studio is set to help you discover talent for your future or to help you repair that favorite shirt, skirt, or trousers. Several days each week, our team is here to help you strengthen your skills or develop new ones, to make a repair, or to develop a talent in design. The only limit is your time and imagination!

Celebrate Recovery

The name can sound ominous. However, everyone at some point battles, hurts, hang up, bad habits, or even addictions. Every Thursday at 7 PM, Matt Vangura leads a team of compassionate, loving people to spend quality time to help us all become the person we are designed to be. This is not a twelve-step program, but an introduction to a lifestyle of hope and freedom!

Events

We like to celebrate around here, so Christmas, Easter, block parties, and birthdays are all reasons to celebrate our community and you! Please check our calendar, Facebook page, or Instagram for events through the Full Potential Project!
